[FY17Q3 DRAs for registration review.docx](#)
[Monthly Chemical Meeting_Q2_01_26_17_Final.pptx](#)

I am not on the meeting invite for the program review meeting. Am I supposed to be?

Thanks

Katrina White

Subject: Planning for April 20 Program Review

Dear Branch Chiefs,

The purpose of this email is to give you a heads-up on expectations for the next Program Review, scheduled for April 20. For this first Program Review of Q3, Rick has requested slides dealing with upcoming (Q3) draft risk assessments. Attached is a list of chemicals with Q3 risk assessments.

Looking at the list, you can see that for some cases, only an HED assessment is pending for Q3. You also may notice that there are some cases that were previously included as Q2 risk assessments, and here they are again!

We wanted provide all of you with this heads-up because the CRMs assigned to these cases will be contacting your staff soon to work on high-level summaries of the pending risk assessments. We recognize that it may be far too early to provide summaries that are very specific (numeric). What we are looking for is identification of the risks of concern for:

(EFED) birds/mammals, fish, aquatic invertebrates, terrestrial and aquatic plants, pollinators

(HED) dietary, residential handler and post-app, aggregate, drift, occupational handler and post-app

...as well as other salient information on risk from the perspectives of your staff and PRD CRMs. I am attaching the slide deck from the last time we briefed OPP mgmt on risk assessments, to give you a better idea of what we will be looking for (see esp. slide #s 9-11 and 27-32; we may also have a few slides on the pyrethroids as a group, perhaps along the lines of the OP slides, #s 21-23).

Please let us know if we left anyone out that should have been included as an addressee on this email, and please forward to your staff as you like. CRMs should be contacting them soon. Thanks,

Melanie Biscoe and Jill Bloom, TLs for PRD/RMIB5
